

## Company Profile

The company's promoters have spent more than 50 years cultivating connections with clients across a wide range of industries. The diverse client base has provided experience in highly specialized areas of product applications and performance enhancement. The company began as an air-conditioning contracting firm, then expanded into the manufacturing and distribution of new technology in India.

Jay & Co India Pvt. Ltd. is 26-year-old distribution business headquartered in New Delhi, associated with most renowned brands for years

- Gripple
- Honeywell
- Eaton
- Trion
- Energen
- Termion
- Cischem
- Iflow India
- GVD
- Crompton Lighting
- Sevo Systems
- Saltos
- EfaFlex Doors

The company deals with unique products such as:

- Gripple Wire Rope:
  - Modular Support Systems
  - Seismic Support System design and implementation
- IAQ (Indoor Air Quality).
- Fire Alarm System, Emergency Light System, Exit Signages, ELV System.
- Exhaust Air Treatment (Dry Scrubbers for Commercial Kitchen)
- Heat Pumps, Solar Hybrids,
- Fire Retardant Coating
- UV Coatings
- Real Time Air Quality Monitoring Solution
- Security & Surveillance
- Indoor & Outdoor Lighting solution
- Gas Based Fire suppression System
- State-of-the-art wire-free and keyless electronic access control solutions
- High Speed Doors

We have been successfully delivering new innovative technologies to India for last 26 years.

Our offices are located in Delhi, Mumbai, Pune, and Bangalore. Our technical expertise of complicated systems, skilled installation teams, pan-India presence, and customer-focused approach have helped us win repeat business and introduce new and innovative solutions to the Indian market. We have a skilled team of designers who can work on intricate designs in CAD, Rivet, StaadPro, Autodesk Inventor.

Wire (GripplE) hangers can be used to suspend all static mechanical, electrical and HVAC services. Wire (GripplE) hangers consist of a pre-formed wire rope sling with either a ferruled loop, permanently fixed threaded M6 (or M8) stud, or permanently fixed nipple end with toggle, at one end or hook or eyelet. The system is secured and tensioned with a GripplE hanger self-locking grip at the other end. Wire (GripplE) hangers have been independently tested by Lloyds Register, APAVE, TUV, CSA and SMACNA, approved by ULC and CSA and comply with the requirements of DW/144 and BSRIA - Wire Rope Suspension Systems. Wire rope used is manufactured to BS EN 12385: 2002. Static & Seismic wire based Support system, Modular Support system.

## Honeywell

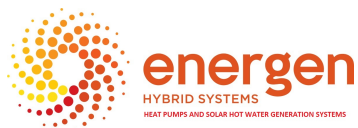

Honeywell along with JayCo group has been focusing its efforts on improving indoor air quality in India. Honeywell invented the two-stage electrostatic precipitation filtration technology which is widely used in commercial buildings, schools, hospitals, public transportation facilities, and even transportation vehicles across the globe

Eaton Corp PLC is a diversified power management company operating for over 100 years. The company operates through various segments, including electrical products, electrical systems and services, aerospace, Hydraulics, vehicle, and most recently, e-mobility. We represent their Electrical and Fire Alarm product division.

Trion Kitchen Exhaust system was Launched in India in year 2005 , Jayco group promoted this product , where there was no market for this kind of products in INDIA, with lot efforts and education of customers & design engineer , this product has become a standard part of any commercial/ industrial Kitchen.

Energen Hybrid Systems was founded by a group of dedicated professionals with over 30 years of experience in the field of renewable energy. Our high quality, high performing integrated systems are driven by the requirement, solution oriented, with various options, flexibility in design and ease of installation. Our vision is to be a market leader in hot water technology by providing the right & effective solution through sustainable energy efficient systems with the use of reliable technology engineering, quality components and backed with top class installation and services. The company is head quartered in New Zealand with our R&D facility in Australia. By combining Heat Pump technology in conjunction with solar collectors (a hybrid solution) some powerful synergies can be gained. Energen Hybrid Systems products use a range of technologies to provide efficient and cost-effective solutions. Aesthetic design and numerous quality certificates make our range of collectors and systems unique. Each individual product series is manufactured aiming at highest efficiency for practically any size of installation, from industrial sized projects, apartments and hotels to schools, villas and smaller residential schemes. Besides, all our products will also integrate easily with existing heating system.

**TERMION®** is ultra-thin Thermal Insulation coating for quick and economical solution for the thermal insulation at industrial and civil construction facilities

The **fire retardant paint** is designed for thin-layer fireproofing of objects; it covers the protected surface with a foamy coating, the fire protection properties of which are due to the physical and chemical processes occurring in the coating in case of a standard fire, accompanied by a high endothermic effect and the formation of a carbonized layer (foamy coke) with low thermal conductivity. Coating is tested for 2 hours fire rating (as per ASTM E119/UL263).

We are channel partner for CISCHEM SOLUTION LLP is involved in the supply of Fire Retardant Intumescent Coatings, Insulation Protective Coatings, Insulation Adhesives, Duct Sealant, Low VOC & Food Grade Sealant, Cold Applied Rubberized Bituminous Adhesive, SOx & NOx Protective Metal Coatings

CISCHEM SOLUTION LLP is also involved in the application & supply of Heat Reflective Coatings, Waterproofing Compounds, Water-Proof Coatings, Epoxy Coatings, Poly-Urethane Coatings, Polymers, Cement Admixture, Plasticizers, Retarders, and specialty products.

Iflow India provides Real Time Indoor Air Quality monitoring solutions which includes monitoring devices which can capture indoor air pollutants such as PM2.5, PM10, CO2, TVOC, Temperature and Humidity, connects to cloud server for storage of data and report generation. IAQ device connects to cloud server through wifi or can send data to Building Management System using RS485 port on Modbus RTU protocol. Data can be seen on Mobile App, Web, it can also display data in common areas on LED TV using customized android app.

We are channel partners for Genius Vision Digital, a Taiwan based strong Manufacturer with global presence and can offer you our various product from IP Video Surveillance Architecture to Integrated GVD- Neuron(IGCC) platform, which are one of its kind for various market applications. The product range includes but not limited to:

- **GVD- Neuron:** An integrated platform which is Highly Open and Scalable in architecture for connecting different devices and system to a Single Dashboard.
- **GVD – Clarify:** Our AI based Video Analytics Platform for customized AI applications.
- **VMS MANAGER:** is the Management console for the platform fully integrable with third party systems.
- **DIRECTORY SERVER:** It's the library to store the logs and settings of the whole platform.
- **FAILOVER SERVER:** It immediately takes over if NVR fails due to over loading.
- **BACKUP SERVER:** Another storage for video data in case of any mishap.
- **VIDEOWALL:** delivers high quality images expandable to 40 monitors.
- **Cameras:** Box, PTZ, MP, H.D, Wireless, ANPR, Low Light, WDR, Thermal, Vandal proof, Panoramic, Dome, Speed Dome, Infrared.

Besides, we have our own Enterprise Net Video Recorders: **Mobile NVRs, Fan less ATM NVRs, True enterprises NVRs, Mini Enterprises NVRs, Standalone NVRs.**

# Crompton

Crompton lighting has been a pioneering player in the field of artificial illumination since last three decades. It has contributed significantly to the development of good lighting practices in most of the application areas such as: Indoor Commercial, Industrial, Consumer (Domestic).

Outdoor Area Lighting, Flood Lighting, High Mast Lighting, Street Lighting, Landscape Lighting & Flameproof Fixtures.

Crompton core strength lies in its strong R&D/Design Team center comprising of state of art ISO 9001/2000 Certified lighting Laboratory having fully automated mirror Gonio photometer (High Speed photometry) for measuring spatial distribution of light and evaluating the optical performance of the luminaries.

## SEVO<sup>TM</sup> SYSTEMS

SEVO<sup>TM</sup> Systems has always been the leader in the development of Clean Agent Fire Suppression Technologies utilizing 3MTM Novec<sup>TM</sup> 1230 Fire Suppression Fluid. SEVO's comprehensive product line offers systems capable of protecting Special Hazards of all sizes, from the smallest server cabinet, up to large electric substations. If you've got a hazard to protect, SEVO Systems has a solution.

## SALTO

inspired**access**

Since more than 23 years, SALTO Systems has been delivering state-of-the-art wire-free and keyless electronic access control solutions. SALTO has been synonymous with innovative solutions, including on-premises, cloud-based and mobile application-based access control solutions, that set new standards in security, manageability, flexibility, and design that bring real-world benefits to virtually any door and building type. Across a broad range of industries and applications, SALTO is widely recognized as a global market leader in smart electronic access control solutions. Salto platform provides flexibility and scalability to design access control solutions with the combination of wire-free electronic locks + controller-based readers that work in real-time communication with its patent DATA ON CARD technology, which enables us to provide an industry-specific solution Electronic locking solutions for every access needs.

**Jay&Co**

EFAFLEX produces high-speed doors for industrial applications. EFAFLEX are global leaders in the design and manufacture of high-speed industrial doors. Founded in 1974 in Germany, we have a network of sales and distribution centers that enables them to supply products in over 53 countries including India. With its innovative door solutions, EFAFLEX caters to various industries i.e. Airports, Food-Beverage, Pharmaceutical, Manufacturing, Warehousing, Chemical and cold Storage sectors.
